

Covid-19 Safety Protocols - What we are doing to keep you safe

Dear Patients & Families,

Our office has always followed strict infection control standards in order to keep us all protected during this pandemic and in the future. Below is a list of some of the enhanced measures we will take:

- + Strategic occupancy levels
- + Screening protocols
- + Physical distancing
- + Plexiglass barriers at our reception areas
- + Enhanced disinfection and sanitation
- + Medical grade HEPA air purifiers in every treatment room for clean and fresh air
- + Temporary removal of toys and magazines in the waiting areas to eliminate contacting surfaces

Safety Measures as required by Ontario Health:

- Managing appointments to allow for social distancing between patients.
- Wearing a mask or cover before entering the office.
- Doing a quick and easy temperature check.
- Providing hand sanitizers at the entrance and around the clinic for you to use as frequently as you must.
- Requiring only a single person to accompany the patient inside the office.

Rest assured, all these procedures are designed to create the safest environment for you and everyone else.

Be well & stay safe,

Dr. Daniel Seah, Associates & Team
